

Spraying Equipment

Cape Agricultural Products supplies different types of spraying to satisfy your needs for spraying herbicides and insecticides, or for fighting fires.

Knapsack Sprayer

The Crossmark knapsack sprayer is a reliable, affordable sprayer that is available in 2 models
PB16 - 16Lt capacity
PB20 - 20Lt capacity

The sprayer is used in many industries, including horticulture, agriculture, forestry and landscaping.

The PB16 and PB20 sprayers come standard with a metal lance as well as a spare set of washers. A filter is included, to keep dirt from getting into the nozzles.

There are additional [nozzles](#) available if you require a "cone" shaped spray or a "flat fan" spray.

To prevent spray drift when spraying in windy conditions a [protector hood](#) is available, that fixes to the front of the spray lance.

Spare Parts are available in order to maintain the sprayer.

[View/Download the parts diagram and listing chart \[861Kb\].](#)

Hand Sprayer

This **2Lt** sprayer is very handy for use in nurseries, greenhouses, propagation tunnels and also for spraying poisons when doing alien clearing.

The body is made from heavy duty plastic and the nozzle can be adjusted to give spray patterns ranging from fine to coarse.

[Note : Colour and shape may differ from picture shown]

Pressure Sprayer

This **5Lt** sprayer, made in Italy, is also ideal for use in nurseries, greenhouses, propagation tunnels, parks and gardens.

The sprayer has the following features :

- Various spray [nozzles](#).
- Flexible, plastic lance, as well as an extension lance that extends the lance to 80cm for spraying at height.
- Elbow for end of lance so spray nozzle points downwards.
- Adjustable shoulder strap, 130 x 3cm.
- Wide filler opening - 10cm.
- Filter in trigger as well as filler opening.
- Safety valve and pressure indicator.

The body is made from heavy duty plastic and a stabilising base is now included that helps to stop the can from falling over when placed on the ground. *[\[click photo above for more detail\]](#)*

Maximum capacity = 5Lt, optimal capacity = 4Lt.

Firefighting Sprayer

This spraycan is used when fighting fires.

A very heavy duty plastic can that is equipped with a double action hand pump to ensure the continuous flow of water when fighting fires.

Tank Capacity = 20Lt
Spare parts are available.
