

DEWcor Developments

108 Miller Street
Gordon's Bay 7151

Phone: +27 74 532 9081

Dewcor specializes in alternative and green building solutions that are extremely strong and durable. The Light Steel Frame market is growing and becoming increasingly popular. This modern green construction method leaves a much smaller carbon footprint on the environment. It saves water during the construction phase and the high-end insulation used, ensures a much warmer building in winter and much cooler building in summer leading to a big saving on electricity bills.
