This is a popular choice due to its relative cost effectiveness. It is a popular choice for domestic properties, security complexes and developments. All our steel is galvanised for longevity.Steel Bar and Wrought Iron FencingOur Bar Fencing is manufactured from square tubing. Choose from a standard plain design or a more decorative finish with the many cast-iron Fleur-de-Lis spear moulding designs available to decorate the top of the fencing. Alternatively, the fencing can be fitted with razor comb or Baracuda Spikes for added security. All our steel is galvanised for longevity.Pool FencingOur pool fencing is manufactured according to municipal requirement. Choose from the U-shaped design or our popular alternative Bar Fencing which is made from square steel for a more decorative finish to enhance your pool area. All our steel is galvanised for longevity.BURGLAR BARSBurglar Bars InternalOur internal burglar bars fitted onto wood or aluminium frames are manufactured from solid square steel for the frame and internal bars. For added security we manufacture burglar bars with hollow square tubing frames which are bolted into the walls with solid square internal bars. Our burglar bars are galvanised and can be finished in the same colour to match the aluminium window frames to blend in.Burglar Bars ExternalChoose from our standard design manufactured from 10 or 12mm solid square or solid round bar or our more decorative designs. All our steelwork is galvanised for longevity.GATESDriveway GatesAt Brian’s Engineering our driveway gates are manufactured with precision and durability and to enhance both security and curb appeal. We have a range of steel and wrought-iron designs which can be fitted with Wood, Nutec or Aluminium plates for a stylish finish. Whether you are looking for a classic or modern design, we tailor each gate to meet your specifications. We

supply and install gate automation and intercom systems for convenience and safety. All our steelwork is galvanised for longevity.Security and Pedestrian GatesSee our range of steel and wrought-iron custom fabricated designs for Pedestrian, Security and Garden gates. Gates can be fitted with wood, Nutec or aluminium plates. Gates can be fitted with electric locks for remote operating. All steel is galvanised for longevity.BALUSTRADING / RAILINGSBalustradingOur custom manufactured steel and wrought-iron Balustrading and Railings can be plain design or can be enhanced with decorative ornamental cast-iron mouldings. All our steel is galvanised for longevity.RailingsOur custom manufactured steel and wrought-iron Balustrading and Railings can be plain design or can be enhanced with decorative ornamental cast-iron mouldings. All our steel is galvanised for longevity.
