We delight in excellence and elegance in our creative designs, focusing on high quality, exquisitely crafted jewellery. With twelve years of experience, we can bring any vision to life to suit your personal style. We offer a 3D cad on-screen rendering on all our custom-made engagement rings for you to see the full view of how your ring would look, before production. Even though designing is our field of expertise, we also specialize in repairs, resizing and modifications on gold and silver jewellery under one roof. Taking special care when restoring or modifying family heirlooms.
