Phone: +27(21) 8529859

AboutTreevolution is the pet project of South African journalists Laura Grant and Alastair Otter. It's a collection of environment-related news and views that may be of interest to other people who're concerned about what's happening to the planet and want to live in a more ecofriendly way. It is also an ongoing documentary of one family's attempt to learn more about the world around them and how to live sustainably. View the various sections of our website.
