Main tasting room The tasting room comprises a number of tasting pods. This unique pod concept was implemented in 2009 and was aimed at creating a more welcoming and less rigid environment. The tasting pods offer tastings of 6 different wines with dedicated hosts. There is a wide range of wines available to taste, including a selection from the single vineyard range. Your tasting includes a selection of 6 to 8 of Fairview's Jersey milk and goats' milk cheeses. These are tasted at a separate pod, allowing tasters to enjoy their wine selection and then move across to the cheeses as they seek out good pairings or their particular favourites.
