Cape Agricultural Products is located in Somerset West, South Africa from where we have been servicing and supplying products to the agricultural and horticultural sectors for over 25 years, building on relationships established over many years. Ideally located on the doorstep of South Africa's wine and fruit growing regions. We manufacture, import, supply and distribute a range of high quality products for the South African Agri and Horticultural industries. We are also able to supply these products to users in neighbouring countries. The products we offer are ideally suited to viticulture, fruit farming, forestry and the horticultural industry. [PRUNING](#) (Click this heading to redirect to our website Pruning page) The range of pruning tools available to the professional and recreational user is vast, comprising one handed shears as well as loppers, saws, knives and many more cutting tools. At Cape Agricultural Products we supply only high-quality products, used around the world by professional users. Download our Pruning products e-Catalogue [NURSERY SUPPLIES](#) (Click this heading to redirect to our website Nursery Supplies page) Cape Agricultural Products supplies various items for use in the Nursery Industry, encompassing items from the propagation of plants to the retail environment. Download our Nursery Supplies Catalogue [TRELLISING AND TRAINING](#)

AIDS (Click this heading to redirect to our website Training Aids page)Cape Agricultural Products supplies many different items to assist nurserymen and farmers when it comes to training and trellising their crops or plants. These items help the grower to either train plants and crops, or secure the plants to supports as protection against wind damage and other environmental factors. Some of the trellising and training aids that we supply are listed below, in no specific order. Download our Training Aids Catalogue

DELTEX® VINEYARD WIRE (Click this heading to redirect to our website DELTEX® VINEYARD WIRE page)Deltex® polyester wire, manufactured by De Lama of France, is the best alternative to the traditional steel wire used for foliage wires in vineyards. This product has been available in South Africa for 12 years and is now imported and distributed by Cape Agricultural Products. De Lama is a French company based in Sarlat, near Bordeaux. Since 1977 they have been manufacturing a range of high tensile products, distributed globally. Made of polyester, Deltex wire has several advantages in agricultural applications such as hanging, greenhouses and of course vineyards. Introduced in 1991 the Deltex wire is recognized in Europe as state-of-the-art and each year De Lama produces enough Deltex to circumnavigate the globe 3 times !! Today viticulturalists are more concerned with the effective management of the vine canopy than ever before and this is where Deltex wire offers many benefits and advantages over traditional steel wire

GROW TUBES (Click this heading to redirect to our website GROW TUBES page)Cape Agricultural Products is proud to offer Snap N' Grow premium grow tubes to the vineyard industry in South Africa. Thousands of grape farmers in South Africa and around the world have profited from the use of grow tubes. Download our **GROW TUBES Catalogue**

HARVESTING TOOLS (Click this heading to redirect to our website Harvesting Tools page)The harvesting of fruit is usually the culmination of many months spent preparing and maintaining orchards, greenhouses and vineyards. This can also either be the highlight or the "worst nightmare" for the farmer, depending on many factors, some within and some without, his control. At Cape Agricultural Products we endeavour to supply the right tool for the harvesting job, relevant to the variety of fruit being harvested. Using the right tools can mean

the difference between packing fruit that is destined and acceptable for export markets, or fruit that is to be discarded. Download our Harvesting Tools Catalogue [DURATOOL TAPETOOL MACHINES](#) (Click this heading to redirect to our website Duratool Tapetool Machines page) The Duratool tapetool machine is used for attaching and binding various types of plants to stakes and trellising wires. Crops that can be trellised include grape vines, berries, tomatoes, peppers, cucumbers and others. Download our Duratool Tapetool Machines Catalogue [BUDDING & GRAFTING KNIVES](#) (Click this heading to redirect to our website Budding & Grafting Knives page) Victorinox - The company in Switzerland known for manufacturing the iconic Swiss Army knife also produces high quality agricultural and horticultural budding and grafting knives. The blades are made from stainless steel with durable nylon handles and brass linings and will provide years of good service. Download our Budding & Grafting Knives Catalogue [TRELLICLIP - FOLIAGE WIRE CLIPS](#) (Click this heading to redirect to our website Trelliclip Foliage Wire Clips page) Trelliclip foliage wire clips are the only clip you will ever need to secure your foliage wires to the poles. We have re-designed and updated the Trelliclip to make it easier to place your foliage wires while working in the vineyard. The new design is able to accommodate wire up to 3mm in diameter without having to be forced into the clip. Download our Trelliclip Foliage Wire Clips Catalogue [VINNET BIRD PROTECTION NET](#) (Click this heading to redirect to our website VINNET Bird protection net page) Bird damage in agriculture results in huge losses on an annual basis. This is particularly true in the fruit and vineyard industry in the Western Cape where ripe bunches of grapes are susceptible to damage. Now a viticulturalist, who has suffered extensive crop losses in the past, has developed a birdnet that limits damage to your crop. This net - known as VINNET - has been developed and used over the past few years, with much success, and is now available through Cape Agricultural Products. Download our VINNET Bird protection net Catalogue [PROFESSIONAL CABLE CUTTERS](#) (Click this heading to redirect to our website Cable Cutters page) When cutting cables or steel wire rope you need the right tool for the job and the Felco range has a model to satisfy the needs of users ranging from the DIY enthusiast to the professional user. Professional cable cutters are subjected to extreme stress in the workplace,

stress that the Felco range of cable cutters are capable of handling with ease. The cutters are of the highest quality available and will satisfy the needs of the most demanding user. Download our Cable Cutters Catalogue **SPRAYING EQUIPMENT** (Click this heading to redirect to our website Spraying Equipment page) Cape Agricultural Products supplies different types of spraying to satisfy your needs for spraying herbicides and insecticides, or for fighting fires. Download our Spraying Equipment Catalogue **OKO PUNCTURE FREE** (Click this heading to redirect to our website OKO Puncture Free page) Because OKO puncture free concentrate tyre sealant is specially formulated to provide long-term puncture protection for industrial, agricultural, commercial and military vehicles. Download our OKO Puncture Free Catalogue **VERMICULITE** (Click this heading to redirect to our website Vermiculite page) Vermiculite is the geological name given to a group of hydrated laminar minerals, which are aluminium-iron magnesium silicates and have the appearance of mica in its natural state. It is found in various parts of the world but the largest mine in use today is located in Phalaborwa in the North Eastern corner of South Africa. The vermiculite mined here has the remarkable ability to expand to many times its original volume when heated - a process known as exfoliation. Download our Vermiculite Catalogue
