Today the Stargrow Group of Companies consists of:

### Stargrow Nurseries

Stargrow Nurseries is one of the biggest suppliers of plant material in South Africa, specializing in the development and delivery of high quality plant material and supported by high levels of excellence in service.

### Stargrow Cultivar Development

Stargrow Cultivar Development specializes in the development of a unique range of fruit cultivars which adds value to production on the farms of growers who plant them. The company takes care of the commercialization of these varieties, both locally in South Africa and throughout the world and it manages the Intellectual Property Rights of these varieties.

### Stargrow Africa

Stargrow Africa project manages the development of new agri projects all over Africa until they can be handed over to the owners. Stargrow Africa identify opportunities and work in partnership with local investors implement agri-projects through all the phases required and continue to supply technical support thereafter.

### Stargrow Fruit Marketing

Stargrow Fruit Marketing focuses on local and international marketing of fresh fruit, exporting fruit from South Africa mainly to markets in Africa, the Middle and Far East. It also sources fruit outside South Africa in order to sustain all year round marking activities.
