One of the greatest challenges humankind is faced with is the effective management of our scarce water resources. Access to water is a prerequisite for all human activities and sustainable economic growth, with the provision of safe drinking water and associated sanitation services in particular having a significant impact on the health of communities. Emanti Management is a young & expanding broad based black economic empowerment (BBBEE) water and environmental engineering company. Our focus lies in proactively assisting both the public and private sector in finding effective solutions to the water and environmental management responsibilities they face in their daily operations. Our organization offers a consistent level of top quality service and unique personal attention from our well balanced team of highly skilled professionals. Using sector approved water quality management tools we provide holistic and effective water and environmental management solutions – putting our clients in control.
