Since our establishment in 1994, Compuscan has emerged as a reputable and trustworthy credit bureau, committed to providing total credit reporting and risk management solutions throughout the credit life-cycle. Over the years we have experienced rapid growth and have evolved from being a local credit information agency to a full service credit bureau delivering solutions to a range of institutions in markets across Africa, including: mainstream banks, microfinance institutions, microlenders, utility companies, co-operatives and credit unions. This progress reflects our commitment to developing quality services and solutions to meet commercial needs.As a full service credit bureau, we offer a range of comprehensive datasets which offer a holistic view of consumer and business information. Our data includes account/repayment information, previous enquiries, identification and contactability information, public domain information, collections information, default adverse information, debt restructuring information, commercial/business credit information, property information and director information. In addition, our data includes bureau scores, employment histories, bank codes, securities information, trade references and fraud information to assist businesses to make the most informed decisions.
