Numill Marketing is an agent and wholesaler of bulk timber. Numill procures hardwood and softwood timber products locally and internationally. We wholesale these products throughout South Africa, Namibia and Botswana. Numill sources only the highest quality timber and strives to provide customers with unsurpassed service. Numill was established in 1989 by Pierre Venter and initially the business bought and sold only local South African pine. The business has grown steadily, expanding into hardwood products, throughout South Africa and into value-added timber products, like decking, and plywood. The business is still owned and managed by Pierre Venter and still maintains an entrepreneurial and informal attitude, where customer service and great quality is of paramount importance. Numill has its head office in Strand, Cape Town, an office in Gauteng and warehouses located in Gauteng and Durban. Twenty five employees in the Cape Town and Gauteng office are available to assist customers and deliveries take place daily all over Cape Town and Gauteng. Numill's warehouses have space for thousands of cubic metres of timber, ensuring availability of the variety that customers require in species, grade and dimension of timber.
