THE ORTHOPAEDIC PRACTICEOur practice is a people's practice where we still believe that the patient comes first and all patients are treated equally and in a professional manner. We still believe in the old fashioned way of treating the patient as a human being and not to focus only on the specific problem that presents itself. We believe in making the patient a partner in the process by empowering them with the correct information so that an informed decision can be made. A holistic team approach is essential when providing world-class service. This team includes our staff at the office, physiotherapists, occupational therapists and orthotists. I am also privileged to work with a wonderful and highly skilled theatre team that is always willing to walk the extra mile.
