

RAP Land Surveyors

4 Spicatus Close
Gordons Bay 7140

Phone: +27(21) 8562971
Fax: +27(21) 8560958

We provide professional land surveying for cadastral and sectional title, determining the exact measurements and locations of property boundaries. Provide data relevant to the shape, contour, gravitation, location, elevation, or dimension of land or land features on or near the earth's surface for engineering, mapmaking, mining, land evaluation, construction, and other purposes. We also provide Topographic Survey gathering data about the elevation of points on a piece of land and presents them as contour lines on a plot. The purpose of a topographic survey is to collect survey data about the natural and man-made features of the land, as well as its elevations. Topographic maps are used to show elevations and grading features for architects, engineers, and building contractors.
