Roof Insulation Western Cape Pty Ltd

21 Mansell Rd
Killarney Gardens 7441

Phone: +27 87 711 0229

Good Roof Insulation is key to keeping your home warm in winter and cool in summer. It’s one of the most important investments you can make in your home, and it’s not as expensive as you might think. Cheap Roof Insulation can do more harm than good. We have a wide range of Thermal Insulation Products to choose from, so you can find the perfect one for your home. Our products are made from high-quality materials that will keep your home comfortable all year round.ROOFING INSULATION WHAT YOU MUST KNOWAs a homeowner, you know that Roof Insulation is important for keeping your home comfortable. But did you know Thermal Insulation is compulsory in all new homes? Insulating your home is one of the best ways to save energy and money, so make sure your home is up to code! For this reason, it is important not only from a financial perspective but also because energy costs significantly impact global warming and climate change. This change aims to build more energy-efficient homes, resulting in less need for heating and cooling. Roof insulation is particularly important, as it blocks 90% of heat flow via the ceiling into the home. A further 30% is lost via the windows, so if you have double-glazed windows, you won’t lose any heat through them.TYPES OF INSULATIONThere are many types of thermal insulation on the market, from home insulation products to

high-temperature industrial insulation used in furnaces and boilers. However, we are only focusing on insulation for homes and Soundproofing and acoustics.IsoboardIsoboard Thermal Ceilings are by far the most popular ceiling option on the market today.The XPS IsoBoard Ceilings have a tongue and groove finish. Our sister company Cape Ceilings and Drywalling give Isoboard XPS a 5-star rating.Factorylite Insulation for factory roofsFactorylite Roofing Insulation is the most advanced thermal insulation for factory roofs. With a class AA 1/1 fire rating, the Factorylite is the most advanced insulation for factory roofs.Factorylite insulation is available in a number of thicknesses from 50mm thick through to 135mm thick.WhirlyBird Roof VentilatorsWhirlyBird roof ventilators are an ideal fit for all homes wanting to reduce the heat in the roof space. Significantly Roof ventilators also minimise the effect of condensation and mould in the roof space.Roof ventilation units work with or without wind. ATTIC INSULATIONATTIC INSULATION is vital for any home. Not only does it keep your home more energy efficient, but it also provides a lifetime of comfort. We stock the best Attic Insulation products to ensure your home is as comfortable as possible. ATTIC INSULATION helps regulate the temperature in your home, keeping it cooler in the summer and warmer in the winter. It also helps to reduce noise pollution, making your home more peaceful. ATTIC INSULATION is an investment that will pay for itself many times over. Contact us today to learn more about our Attic Insulation products and how they can benefit your home.5 Star Aerolite InsulationAerolite insulation is the only locally manufactured roof insulation specified for Hospitals, Schools and Clinics. As a result of the high-grade insulation properties and the Non -combustible fire rating, Aerolite is now the most advanced Roof Insulation product available that can improve indoor temperature by 5-8 degrees in summer and winter. The Aerolite Soft Touch Product range is available in various thicknesses to suit any application. Contact us today for a free quote!5 Star Knauf Ecose Roof InsulationKnauf Ecose Insulation imported from Germany is regarded as one of the most advanced Roof Insulation products. Knauf Ecose Thermal Insulation is specified for Hospitals, Schools and Clinics. As a result of the high-grade insulation properties and the Non-combustible fire rating. Knauf Insulation’s Ecose Technology reduces the product’s

embodied energy by up to 70% and delivers thermal performance that is unrivalled in the market today.2.5 Star Isotherm ceiling InsulationIsotherm insulation was once a trusted product with a 4-star rating. However, it is no longer approved by the SABS, and its rating has been reduced to 2.5 stars. The main reason for this is because Isotherm is now considered a combustible material. For this reason, it cannot be installed in hospitals or schools, as the fire risk is too high. However, Isotherm can still be used in other applications where the fire risk is not as significant. Sadly Isotherm is no longer popular.INSULATION PRODUCTSAerolite InsulationKnauf Ecose InsulationIsoboard Thermal CeilingsFactorylite InsulationCavityBattIsotherm InsulationSANS COMPLIANT INSULATION135mm Aerolite InsulationKnauf Ecose Insulation135mm Factorylite InsulationSERVICESInsulation InstallersRoof VacuumGeyser InsulationShop ProductsAerolite Knauf EcoseFactoryliteIsoboardRoof VentilationRadenshield Foil
