Cape Ceilings and Drywalling offer the highest quality craft at affordable prices. Our experience in Drywalling has ensured our status as a market leader in this field. Our years of experience and passion for what we do have made us one of the most successful competitors on the market. Contact Us for the best deal in town if you need Drywall Partitioning or Ceilings. RELIABLE & PROFESSIONAL CEILING AND DRYWALL PARTITIONING COMPANY More than 30 years ago, we started Roof Insulation Western Cape. At this time, many homeowners would ask for advice on ceilings and partitions. We would refer some to contractors that we had met on various building sites only to discover they would be letting clients down. For this reason, in 2001 we decided to hire and train our staff for all types of ceilings and drywalling. Peter Lategan then started the company Cape Ceilings and Drywalling, and we applied the same service and quality in all work we do. CAPE CEILINGS & DRYWALLING Our passion at Cape Ceilings and Drywalling is what we do—transforming your dream into reality. We have many years of experience in our field, offering the best pricing on the market. Drywalling: We create Drywall Partitioning for offices, spare bedrooms, shops and more. Isobord Ceilings: We sell Isobord XPS ceilings as well as install them. If you want the best ceiling on the

market, think Isoboard XPS. Suspended Ceilings: Cape Ceilings and Drywall fit all types of suspended ceiling options. Thermal Insulation: We install and supply Aerolite Insulation and Knauf Ecosse Insulation in ceilings. Ceiling Vacuum: Our ceiling vacuum service is one of a kind. Our industrial vacuum machine stands outside the home with the pipes going into the roof space. OUR SERVICES Reliable & Professional Cape Ceilings and Drywalling are a family run business and we are passionate about what we do. Every project is taken seriously as we always strive for the best. All our staff are well trained we do not use the services of casual labor. Also we are covered by comprehensive insurance in the event of a mishap. We are proud to say we have never submitted a claim as work safety and quality are essential for success. All our workmanship is covered by our 5 year workmanship guarantee. Isoboard Ceilings Isoboard XPS Ceilings are the first and only Thermal Ceiling on the market. XPS is available from 25mm to 80mm in thickness. The Isoboard Ceiling boards are 600 wide with the typical tongue and groove finish. Importantly Isoboard Ceilings do not absorb water, so they are not affected by roof leaks. If you would like an XPS Isoboard Quote, Contact us now. However, it is essential to insulate with Aerolite insulation above the Isoboard ceilings to reduce noise. Isoboard and Summit XPS Ceiling boards are 32Kg. Suspended Ceilings Suspended Ceilings are traditionally found in shopping malls, factories, offices and hospitals. Suspended ceilings are available in options and colours. Panel sizes are 600×600 or 600×1200. In offices and certain buildings, an acoustic suspended ceiling is preferred over the standard version. RhinoBoard Ceilings RhinoBoard Ceilings or Gyprock Ceilings have been on the market for many years. However, in the last few years, there have been some stunning changes in the look of these ceilings. Drywall Partitioning Traditionally Drywalling has been utilized in office blocks and shopping malls. Drywall Partitioning is ideal as a cost-effective way to create a room or office. However, many homeowners use drywalling to change their homes' interiors because of the cost-effective benefits of creating indoor space. Soundproofing Walls & Floors As we all know noise between semidetached homes or double story homes with wooden floors can be a nightmare with noise pollution. For wall we add a special made drywall application with

acoustic insulation barrier. For floors we add the insulation below and add a new RhinoBoard skin ceiling.
