

Spaceworks Frameless Glass & Aluminium

Unit 3 Greenville Terrace
Diep River, Cape Town 7800

Phone: +27 82 651 2910

We are based in Cape Town and specialise in the manufacture and installation of aluminium products such as balustrades, gates and fencing. As well as specialised products such as frameless glass, expanded metal, frameless glass sliding doors and architectural frosted, decorated and coloured glass for interior and exterior applications. We have been serving customers since 2004 and cater to both the commercial sector and domestic clients, offering a full service from consultation, design, manufacture and installation. Aluminium is the perfect long-term, cost-effective way to enhance any home, building or development. Improve the value of your home, add style, class and beauty with a quality installation of maintenance-free Aluminium, custom-made to suit your requirements. Choose Aluminium, it's for Life! No more painting, no rusting, no peeling. OUR PRODUCTS & SERVICES

INCLUDE Frameless Glass Sliding, Folding & Stacking Door System The SpaceWorks Frameless Glass Sliding & Stacking Door System – exclusively imported from Europe – is not suspended, it slides on the lower rail. This enables us to use the most discrete profiles so you can enjoy an uninterrupted view of the world outside. Our Stackable Doors are bottom-supported, it is more reliable, flexible, and secure than the top-hung systems. The weight of the glass panels (over 400kg on average) is

carried on the ground track, making it a strong, dependable, and flexible installation, suitable for any type of ceiling. Practically any configuration (sliding door, stacking door, etc) is possible and the system can be used for interior or outdoor application.

Frameless Glass Slide System Top Performance, Simplicity & Style. The lowest bottom tracks on the market. Best performance – Best Quality – Superior Style. Slide has the least amount of components on the market, all of them of the highest quality, which assures a reliable long-lasting performance.

Bottom weighted systems – no upper reinforcement required! The lowest bottom tracks on the market for outdoor commercial & retail spaces and indoor spaces – From 17mm to less than 1 cm!

Expanded Metal Mesh Whatever the application or destination of your project, expanded metal offers you versatility and complete freedom of expression. We custom make expanded metal mesh to your requirements, including colour and design. One of the advantages of expanded diamond mesh for architecture use is versatility. This is due to several factors: mesh shape, mesh opening, base material weight, ductility, finishing options, sustainability. Costs are affordable, with evident advantages.

Basic and linear façade cladding where the big mesh and the use of color give personality to any building. A perfect match of the sheets is guaranteed by the high efficiency of production. Mesh used on balconies support the brightness of the building. Design and opening of mesh are in harmony with the other design materials used.

Custom Made Aluminium Balustrades Our custom aluminium balustrades provide an enduring architectural feature that will enhance the beauty of your home or building and add value. Aluminium is the perfect long-lasting and cost-effective way to enhance any home or building. No more painting, rusting, or peeling. Our Aluminium Balustrades are for life! All our aluminium balustrade installations are undertaken by our professionally trained teams to our high standard of quality. Most of the components are pre-cut, off-site, to reduce installation time. Vertical stanchions are attached through any floor surface with corrosion resistant rods which are rock-set for complete security and safety, eliminating the need for cutting tiles around the stanchions and providing a neat finish. All styles can be fitted to both stairways and horizontal areas with minimal loss of stairway space. Handrails may also be fitted separately and fixed

directly onto walls. Custom Made Aluminium Gates and Fencing Lifetime guarantee offered on aluminium and a 15-year guarantee on the powder coated colour finish. We custom make Aluminium Gates and fencing to your requirements, including colour and design. If you supply a gate motor, we will install it free of charge with your gate. Gates are custom made to your requirements and designed to comply with regulations. Professional installation comes included with your gate and if you supply the gate motor, we'll install it free of charge! We use solid and robust aluminium extrusions and components. The hinges and latches are made from non-corrosive materials. Electric fencing can be fitted to gates as well as intercoms, doorbells, etc. The powder coated colour finish (all colours are available) requires only occasional washing with soap and water. Your new aluminium gate comes with a lifetime guarantee and we offer a 15-year guarantee on the powder coated colour finish.
