ABOUT USSA Fire Watch does not just sell fire protection equipment and systems. Our true value is the skills and knowledge of our team. The people who know how to quote, design, install, troubleshoot and inspect fire protection systems and equipment. We believe in investing in our people so they can take the best care of your fire protection needs. SA Fire Watch focuses on your life safety so you can focus on your business.

SERVICES & PRODUCTS

Fire Hydrants and Sprinklers Fire Hydrants and Fire Sprinkler Systems are installed on properties to enable the attending fire services to commence on initial fire attack to limit the spread of fire. Regular testing and maintenance of fire hydrants and booster connections and associated pump sets is imperative to ensure compliance. Properly trained personnel can also utilize these installations to extinguish fires at various locations on site.

Hose Reels Fire Hose Reels are designed to provide a large, continuous, controlled volume of water to fight Class 'A' fires. The 30 meter long hose enables the user to combat fires in a variety of locations on site and from a safe distance with its long water jet. With the addition of a foam branch a hose reel may be used to fight sizable fires.

Safety and Symbolic Signage We stock a large inventory of SANS 1186 1 & 5 fire and safety signs to suit all applications. Whether it is

mandatory, regulatory, hazard identification or fire related sign, we can supply a variety of sizes and material types. Should you require a one-off custom sign, these can also be arranged.

Emergency and Standby Services

S. A. Fire Watch offers 24 fire watch crews for standby services to marine and movie industry, including private functions and concerts. Our fully equipped fire engines and Skid unit is designed to combat fires as a first line of attack.

Fire and Safety

Compliance Annual Inspection and Certification

If you are a busy building manager or body corporate member, hassles with fire protection are the last thing you need from overwhelming local authority fire departments. Be fully compliant and have regular inspections.

Emergency Evacuation Plans

Simulated Emergency Drills, Design and Draw of Floor Plans

Is your evacuation plan capable of safely and quickly moving out less mobile tenants, visitors and or patients? Would your staff know exactly what to do in an emergency?

Fire Design

Walls and Partitioning

Fire Safety

Powering the needs of industrial, commercial and domestic life. Processing of energy and the development of major services presents significant fire and safety risks. A small fire at a facility needs to be rapidly brought under control before it becomes a major disaster. Our fire engineer partners can design and submit to council for approval.

Fire Detection Services

Fire Panel Testing and Installation

S.A Fire Watch detection systems provide very early detection of even slow smoldering fires and can be configured to detect smoke and heat. Sensitive analytic tools mean early detection that is critical in a facility. Our team of experts can install, service and maintain all types of fire detection systems.

Fire Equipment Sales and Hire

Co-ordinated Management Systems

Fires in the utility industry expose workers and the community to extreme dangers and can be financially devastating. S.A Fire Watch can monitor and maintain your vital equipment through a service level agreement (SLA) to suit your needs. We can supply on demand, fire equipment for your venue or function, movie site or concert.

CCTV INSTALLATION & MAINTENANCE

S.A Fire Watch supplies, installs and maintains a range of different CCTV Systems in Western Cape. Our CCTV systems are SABS approved and meet industry, government and regulatory standards in South Africa. We provide customized installation solutions to cater for divergent individual needs and requirements.

CCTV

cameras have proven to be an effective and failsafe way of monitoring your property. This is to both deter criminal activity and obtain visual footage of any theft or property damage that can then be used for insurance purposes or prosecutorial purposes.

ALARM SYSTEMS INSTALLATION, MAINTENANCE & UPGRADES

Our Alarm systems will deter burglars and recognize fires with single installation solutions which are customized fashionably to cut down on different panel installations. Thus reducing on having a variety of systems requiring different personnel to manage, monitor and maintain. This also reduces on multiple installations of different alarm systems, thereby reducing on the cost. A secure environment dictates upon the ease of gaining both fire safety and a secure environment. At SA Fire Watch our business is to ensure a complete range of safety equipment and systems that protect lives, property and assets. Our systems are tailored to meet your specific property requirements. Fire Detection Systems work in a seamless pattern with our Security Systems which installed together create an integrated safe and secure environment in fire safety whilst safeguarding your property against unwarranted intruders. SA Fire Watch alarm systems provide early detection of even slow smoldering fires and can be configured to detect intruders, smoke and heat. This alarm system is integrated with a panel that caters for both fire and security. Our team of experts can install, service and maintain all types of alarm systems. This work in an all-round applicable panel that have a single control centre. Making monitoring, maintenance and installation manageable in your property.

ACCESS CONTROL INSTALLATION & MAINTENANCE

SA Fire Watch access control security solutions do more than lock and unlock doors. Instead, we provide you with a system to assist you in implementing seamless control of all entry and exit points throughout your premises. We offer a range of stand-alone access control systems and large managed systems, allowing companies to gain situational awareness of their day-to-day operations.
