Pretoriasafety (Pty) Ltd is flexible in product supply and service rendering, so we can supply a product or/service according to your specification and requirements.HEALTH & SAFETY TRAININGWhy Health and Safety Training is ImportantWorkers are often faced with health and safety dangers at their workplace. It doesn’t matter the size of the company, be it a large or small firm, the safety and health of an organisation’s workers should be of paramount importance to the leadership of that organisation.For some industries the dangers might seem obvious while for some they may, but there isn’t any workplace in existence where its’ workers do not face health and safety dangers. Workers in restaurants or in an office might feel safe in their working environment, but as true as it may appear, there exists the potential of food contaminations, poor ergonomics and maybe psychological stress which can be a source of health and safety problems.Health and Safety Training is Important for All Businesses and IndustriesSince all industries face workplace hazards, it is imperative for company owners to provide health and safety training on a regular basis to curtail the chances of any industrial mishap. Did you know that more than two hundred workers die each year due to workplace related accidents, whilst more than one million individuals are injured during this

time frame? Also, more than two million workers suffer from illnesses that are either caused or aggravated by what they do. With all these facts, preventing health-related accidents in the workplace should be one of the principal priorities of employers.OUR COURSESFlagship Course: Hasprac (Non-Accredited and HWSETA Accredited)Your content goes here. RiskCom S.A. (Pty) Ltd have 21 accredited subjects with HWSeta.The Numerous Benefits of Health and

Safety TrainingThe importance of safety and health training does not only end with injuries; there are many benefits associated with having sound safety and health training. A thorough knowledge of health and safety topics can provide many benefits and help in developing a positive health and safety culture among workers. This way, everyone becomes aware of safe and healthy working. If your company has a good health and safety training programme in place, it will help in ensuring that the employees are not prone to workplace accidents or falling ill due to their jobs, thereby avoiding the distress that workplace accidents and ill health causes.Some other important reason for engaging industrial workers health and safety training include the following:Why PretoriasafetyLower Insurance PremiumsReducing Potential Compensation ClaimsIncreasing Productivity and Output LevelsMaintaining Company ReputationLegal Responsibilities and Duty of CareLower Staff TurnoverVIEW ALL OUR E-LEARNING COURSES WE OFFERE-Learning offers flexibility to both the organization and employees, it is in fact popularly known as “anytime, anywhere” learning and with laptops, I-pads and smartphones it can be taken at any time. There is, however, a great opportunity for businesses to take a more collaborative, transparent approach to risk management ensuring greater confidence in business decision making and planning. Organisations have long understood the need to identify and manage risks for the followingFewer

surprisesImproved decision making and performanceContribute to regulatory compliance Yet while some organisations achieve these benefits, other struggles. Our team has extensive experience and skills in assisting both public and private sector clients to develop and maintain sustainable enterprise and project risk management programs that consistently lead to risk management success. HOW?Improved confidence in budget allocationImproved organizational governance and due diligenceContributes to the achievement of objectivesWE OFFER THE FOLLOWING HEALTH & SAFETY SERVICESWe develop customised approaches to reducing H&S risks (that is, risk of injury and/or illness, and non-compliance with H&S laws) by establishing H&S processes that meet newest management standards (e.g. ISO 45001 OHSMS) and H&S legislative requirements.We establish H&S risk management frameworks that incorporate strong governance and H&S management planning processes that integrate with sound business practices and assess a company’s H&S performance and processes before developing a road map to drive improved business performance through reducing H&S risks.We focus on strong governance performance linked to and aligned with business planning, operational and risk management processes to enhance compliance and reduce injury and illness risks.PROPERTY RISK AUDITINGPretoriaSafety conducts Property Risk Assessments (PRAs) of commercial, industrial and retail sites to assist business’, property owners and managers in reviewing and understanding risks associated with their business or asset portfolio, as well as contributing to PCBU due diligence requirements. PRAs are a physical, practical assessment guided by legislative standards and industry best practice. They involve a physical review of key risk areas including for example: roof access, plant rooms, emergency management systems such as fire pump rooms, access and egress. Our property risk assessments provide a simple documented review, including photographs of areas or issues identified as potential or current risk, thereby providing a heat map or quick reference for prioritising and managing risk for your business. Reports are clean and clear using our ‘Risklens’ online reporting tool, developed specifically for this purpose, allowing for client management and tracking of actions.
